Education

University of Guelph — ***Guelph, ON*** Expected Graduation: 2028
Bachelor of Computing in Computer Science
GPA: 3.94/4.00, *Dean's List*

Technical Skills

Languages: Python, JavaScript, TypeScript, C, Java, SQL, C#, Lua
Frameworks & Tools: React.js, Node.js, Spring Boot, FastAPI, Playwright, Supabase, Git, Docker, Postman, IntelliJ
AI & ML: PyTorch, Scikit-learn, RAG, Vector Databases, OpenClaw, n8n, LangChain

Experience

Software Developer Intern May 2025 – Dec 2025
Candescent *Waterloo, ON*

- Optimized file processing algorithms in **Spring Boot**, reducing average API response times by **15%** and eliminating timeout errors for **500+** concurrent users during peak upload periods
- Built a bulk wire payment system using **React.js** and **TypeScript**, simplifying batch payment processing for **100+** companies through automated text file upload and customizable field mapping to database schemas
- Defined server storage allocation and upload limits by benchmarking CSV parsing performance across file sizes and formats, reducing storage overhead while preventing timeout failures for major financial institution clients
- Found critical edge cases in field mapping logic pre-release by writing Jest unit tests, achieving **90%** test coverage

Projects

furnish.ai | *React (TypeScript), Node.js, Supabase, Stripe, OpenClaw* Demo

- Built a full-stack AI SaaS using React, TypeScript, Node.js, and Express that digitally furnishes empty room photos for real estate photographers in **30–60 seconds**, onboarding **15+** users within the first week of launch
- Integrated **Stripe** Checkout API across **5** pay-as-you-go pricing tiers ($8–$300) with automated webhook handlers to instantly credit user generation balances upon purchase
- Distributed organic content through OpenClaw AI agents generating/posting before-after staging creatives using GenViral API, resulting in **300** Instagram followers with $0 paid promotion

Company Policy Agent | *Python, FastAPI, React, TypeScript, Qdrant, Gemini, Inngest* Demo

- Created a searchable company policy knowledge base by building a **RAG** pipeline that chunks PDFs into 1,000 token segments, storing 3,072-dimension Gemini embeddings in Qdrant, powering quick sourced LLM answers
- Enabled self-service policy lookup through a FastAPI REST layer with throttles (20 queries/min, 5 ingests/hr) and a React + TypeScript frontend, resulting in safer rollout and controlled API spend
- Achieved zero failed responses during Gemini rate limiting and outages by implementing durable Inngest workflows with retries at each step and a fallback chain across 3 models
- Eliminated duplicate vectors on re-ingestion by batching up to 100 texts per Gemini API call and assigning UUID5 deterministic chunk IDs for idempotent Qdrant upserts, keeping the vector store clean across policy updates

FireGuard AI | *Python, PyTorch, Flask, React.js, HTML/CSS* Demo

- Trained a two-layer feedforward neural network using PyTorch by preprocessing **6,000+** meteorological records and engineering 5 weather features for forest fire classification, achieving **88%** accuracy on test data
- Built a React frontend using react-map-gl and Mapbox satellite imagery enabling users to click anywhere on the globe to assess forest fire risk, providing actionable risk classifications and confidence scores
- Designed a Flask REST API with OpenWeatherMap integration that ingests live weather data, extracts meteorological features and executes model inference, returning tiered risk classifications and explanations

GryphCourseWatch | *Python, Flask, Playwright, HTML/CSS, JavaScript* Demo

- Built a system for students to monitor university course availability using Python, Playwright, and Flask, resulting in a **30%** reduction in manual registration time across **100+** tracked sections
- Developed a backend notification flow using Flask APIs and SMTP email delivery, resulting in alerts reaching students within **5 minutes** of seat availability detections
- Led a pre-launch campaign on LinkedIn, generating interest from **1,500+** students, validating campus demand

Issued on: 26/02/25

Fall 2023 Bachelor of Computing Honours Full Time

		Credits	Grade	Lab
CIS*1300	Programming	0.50	095 A+	2.00
CIS*1910	Discrete Structures in Comp I	0.50	088 A	2.00
GEOG*1220	Human Impact on the Environmen	0.50	093 A+	0.00
MATH*1200	Calculus I	0.50	089 A	1.00
MCS*1000	Introductory Marketing	0.50	090 A+	0.00

Semester Average: 91.0%
Dean's Honours List
****

Winter 2024 Bachelor of Computing Honours Full Time

		Credits	Grade	Lab
CIS*2500	Intermediate Programming	0.50	098 A+	2.00
CIS*2910	Discrete Structures in Comp II	0.50	087 A	2.00
HROB*2010	Foundations of Leadership	0.50	089 A	0.00
MATH*1160	Linear Algebra I	0.50	100 A+	0.00
SOC*1100	Sociology	0.50	092 A+	0.00

Semester Average: 93.2%
Dean's Honours List
****

Fall 2024 Bachelor of Computing Honours Full Time

		Credits	Grade	Lab
CIS*2030	Structure/Applicat - Microcomp	0.50	091 A+	3.00
CIS*2430	Object Oriented Programming	0.50	088 A	2.00
CIS*2520	Data Structures	0.50	094 A+	2.00
COOP*1100	Introduction to Coop Education	0.00	OP	0.00
MCS*2100	Personal Financial Mgmt	0.50	085 A	0.00
UNIV*2100	Career Ready	0.50	093 A+	0.00

Semester Average: 90.2%
Dean's Honours List
****

Winter 2025 Bachelor of Computing Honours Full Time

		Credits	Grade	Lab
CIS*2750	Software System Dvlmt & Intgrn	0.75	092 A+	2.00
CIS*3110	Operating Systems	0.50	078 B+	1.00
CIS*3490	Analysis & Des. of Comp. Algo.	0.50	082 A-	2.00
SPMT*1020	Sport Management Today	0.50	095 A+	0.00

Semester Average: 87.3%
Dean's Honours List
****

Summer 2025 Bachelor of Computing Honours Part Time

COOP*1000 Work Term I 0.50 P
Employer: Candescent
Division: Head Office
Job Title: UI Software Developer
Work Performance Eval: Outstanding
Work Report Evaluation: Outstanding
Semester Average: 0.0%
Eligible to Continue
****

Fall 2025 Bachelor of Computing Honours Part Time

COOP*2000 Work Term II 0.50 INP
Employer: Candescent
Division: Head Office
Job Title: UI Software Developer
Work Performance Eval: Outstanding
