EDUCATION

University of Guelph

B.S. in Computer Science

Minor in Project Management

Guelph, Ontario

Expected Graduation: April 2027

- **GPA:** 4.00/4.00, Dean's List
- **Related Coursework:** Data Structures, Object Oriented Programming, Structure and Application of Microcomputers, Intro to Programming, Intermediate Programming, Discrete Structures Comp I, Discrete Structures Comp II

PROJECTS

AI FaceID Attendance System

June 2024 – July 2024

- Developed an AI-powered face recognition attendance system using Python and OpenCV
- Implemented automated attendance logging by detecting faces and updating database with each recognized student
- Integrated with Firebase for real-time database management and cloud storage of student data and attendance records
- Designed an interface displaying real-time student information such as name, major, year, total attendance and ID

Contact List Organizer

May 2023 – Jun 2023

- Designed and developed a Contact Management System to facilitate Create, Read, Update, and Delete (CRUD) operations on contact data
- Utilized HTTP methods (GET, POST, PUT, DELETE) to perform corresponding CRUD actions on contact resources
- Backend employs Flask, a Python-based micro web framework, to handle HTTP requests and serve API endpoints
- Utilized SQLAlchemy ORM for seamless interaction with a PostgreSQL database

Zoo Animal Classifier - Machine Learning

Jan 2024 – Feb 2024

- Project based on the Zoo Dataset consisting of 100 animals, each with 10 attributes and a class label
- Implemented a k-nearest neighbors (k-NN) algorithm to predict the class label of a new given animal
- Performed calculations using Euclidean Distance, Hamming Distance and Jaccard Similarity formulas
- Achieved an accuracy of 70% on the test set of 20 animals

Course Scheduler

Oct 2023 – Nov 2023

- Constructed a university course allocation system, using C language for an academic project.
- Implemented functions to efficiently read and process data from external text and binary files, capturing course names and IDs and assigning them to professors

Humanitarian Aid System

May 2023 – Jun 2023

Team Member

- Collaborated on a Java-based aid system software which simulated a platform where citizens could submit loan requests to the government
- Implemented a user-friendly interface using Java's Swing library, allowing for review and management of loan requests in a simulated government setting
- Contributed to features such as application filtering, status updates, and dynamic list rendering to enhance the functionality and user experience of the simulated aid system

ACTIVITIES AND LEADERSHIP

Google Developer Student Club

Guelph, Ontario

Member

Sep 2023 – Current

- An active member of the Google Student Developer Club, collaborating on coding projects, participating in technology events, and contributing to a vibrant community of aspiring developers

Muslim Student Association

Guelph, Ontario

Events Director

April 2024 – Current

- Engaging in religious and educational activities while helping organize events for 200+ people contributing to a diverse campus environment

SKILLS

Programming: Java, Python, C, C#, JavaScript, SQL, HTML/CSS, SQL, Node.js, React.js, Lua

Tools: Git, GitHub, Unity, Visual Studio Code, Adobe Photoshop, Adobe Premier Pro
